An education opportunity for continued learning and professional growth

2017 CLASSES
CALS – Comprehensive Advanced Life Support
Emergency Medical Training

Course Description
CALS-Comprehensive Advised Life Support is an education program designed specifically for the emergency medical training needs of rural healthcare teams.

CALS combines the concepts contained in many of the advanced life support courses and provides a customizable, team-based training program uniquely suited for resource-constrained environments.

Instructors
CALS Rural Emergency Medical Education

Target Audience
Medical Staff, Registered Nurses, Other patient care staff needing CALS certification

Session Details
- Pre-registration is required
