

Both the manic and the depressive symptoms of bipolar disorder can have a negative impact on your life, your relationships, even your job.¹ Talking to your doctor about all your symptoms is an important first step to finding out whether you have bipolar disorder. Answering the questions on this form, and discussing the responses with your doctor, may help you do that. It will take about 5 minutes to fill it out. It is not meant for self-diagnosis, so please bring it with you to your next appointment.
